

INDUSTRIAL SCALE FURNACES

PIT FURNACE

Designed for heat treatment of metals. Pit furnaces preferred for heat treatment of high and low carbon steels, copper alloys, bronze, brass etc. materials which makes such as screws, wire, rods or bolts. Pit / Retort furnaces are available in wide a ranges of volumes and temperatures from 300°C to 800°C continuous use. Please contact us for detailed information.

- Industrial usage , 650°C,
- 560 liter volume
- Homogeneous heat distribution
- Top loading furnace design, loading via crane
- homogenous temperature via fan circulation inside retort
